X12 Express Updates and Version History

Version #	Release Date	Description of Change
6.3.0	03/08/2019	• Multi-user database lock upgrade.
6.2.0	01/14/2019	• Correct address selection when client has multiple address records.
6.1.0	02/01/2018	• Permit user file name changes. • Expand service facility location loop with contact info.
6.0.0	01/09/2018	• Office Compatibility update for 2013 - 2016. • Bypass Zero Unit Records.
5.0.0	02/03/2014	• Meals on Wheels added for CT Users.
4.9.0	04/01/2013	• MHCP Provider ID field changed to accommodate alpha-numeric NPI Taxonomy codes.
4.7.0	10/23/2012	• Added Transportation Patient Count field.
4.5.0	10/15/2012	• Additional description requirement for NOC (Not Otherwise Classified) procedure codes added.
4.4.0	06/15/2012	• Added Claim Number field to allow for multiple claims per client.
4.3.0	04/2012	• Added Transportation Pickup and Drop-off fields for billing transportation by trip.
4.2.0	03/16/2012	• Added the Referring and Ordering Provider field loops.
3.9.0	01/16/2012	• Removed required flags for the Treating Provider fields. DHS has changed requirements and the Treating Provider Loop is not required for some services like Nurse

		Supervision (T1019UA) and Homemaker (S5130).
3.7.0	12/11/2011	• Updated X12 to support 5010 format.
3.6.0	08/12/2011	• Added Line Level Note segment to the database tables.
3.5.0	12/19/2008	• Added the Service Facility Location fields to X12.
3.4.1	07/01/2008	• Changed the Response Code field to use the NPI/UMPI rather than the MHCP Provider ID for provider validation.
3.4.0	05/28/2008	• Updated the Rendering Privider required fields. In some situations the Rendering Provider is an orginization so the first name field is not required.
3.0.0	05/14/2008	• Added the Rendering Provider loop information.
2.0.0	07/01/2007	• X12 is now compliant with the current NPI/UMPI requirements as of July 1, 2007.
1.2.0	10/2006	• Added the Service Line Note field to the X12 Service Activity table. • Added the Payer Identifier field to the X12 Payers Lookup table.
1.1.0	08/24/2006	• X12 now supports Access 2003. • Optimized date sorting on transaction records.
1.0.1	08/01/2005	• X12 initial release.
